DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with James F. McKeown Reg. No. 25,406 on May 21, 2004.

The application has been amended as follows:

Claim 1 line 16, the word "even" has been deleted.

In the ABSTRACT OF THE DISCLOSURE, the first and second paragraphs has been changed to be ONE paragraph; therefore, the space between the first and second paragraphs has been deleted.

Allowable Subject Matter

Claims 1-7 are allowed.

Reasons for Allowance

Application/Control Number: 10/663,746

Art Unit: 3662

The following is an examiner's statement of reasons for allowance: With respect to claim 1, the prior art fails to teach or render obvious the power supply control means for turning off the drain power supply of the FET among the power supplies when it is detected by said voltage monitoring means that either of output voltages of the power supplies is not within the specified range. With respect to claim 2, the prior art fails to teach or render obvious the power supply control means for controlling the gate and drain power supplies at the rise time so that an output voltage of the gate power supply rises earlier than that of the drain power supply. With respect to claim 4, the prior art fails to teach or render obvious the power supply control means for controlling the gate and drain power supplies at the fall time so that an output voltage of the gate power supply falls later than that of the drain power supply. The prior art teaches radar system using high frequency IC with a built-in FET, which is connected to multiple power supplies. However, none of the prior art either singularly or in combination teaches the claimed system.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art shows different radar sensors including a built-in FET transistor.
